The Gradient Tool lets you create radial or linear gradients. You can select the color stops from a pre-built color palette or create custom color stops. For example, you can use the Gradient Tool to create glowing galaxy effect that fades from purple to green. The Paths Tool enables you to draw vector paths. The tool works similarly to a pen or a marker—drawing lines, shapes, and circles. You can even use Paths to create “paper-cut” textures, or provide guidelines for image retouching. The Text Tool lets you type text into an image. You can resize it, change the font, color, orientation, and add shadows, highlights, and outlines. You can also use the tool to create logos or text effects for web pages, posters, or movie titles. The Eraser Tool is similar to the Quick Selection tool in that it lets you erase areas of a photo. However, the Eraser Tool can be used to erase unwanted parts of a picture without deleting the rest of the image. You can also use the Eraser Tool to blur, darken, or lighten an image. The Paint Bucket (or Magic Wand) Tool is used to select an area of an image. You can then erase the pixels you selected using the Eraser Tool. For example, if you accidentally drew an image onto your computer screen, you can use the Paint Bucket tool to select all the parts of the image you don't want, then erase them using the Eraser tool. The Layer Panel is used to add, edit, or remove layers in a Photoshop image. The left panel shows a list of all the layers in an image. You can use the right panel to edit a layer's settings (such as color, opacity, or layer type). You can also use the Layer Panel to adjust the opacity, visibility, or blending mode for multiple layers. There are several tools in Photoshop for editing images in different ways. Some work better than others for certain tasks. One of these tools is the Spot Healing Brush, which you can use to adjust texture and color in an image. Here is a step-by-step tutorial for using the Spot Healing Brush. 1. Open an image. 2. In the tool panel, select the Spot Healing Brush tool. 3. Adjust the tool size to your liking. 4.
