About This Game

Civilizations come and go; common men and kings they get covered by the dust of time in the same way. Monuments and wonders crumble under their own weight. But the cultural legacy is not bygone. Stories and tales about ancestors and their deeds pass through generations, the old knowledge is not lost forever. Soon, new societies, new kingdoms, new civilizations rise from the seeds of the ones which predated them. Decadence is not the end.

Will your legacy stand the test of time?

Field of Glory: Empires is a grand strategy game in which you will have to move in an intricate and living tapestry of nations and tribes, each one with their distinctive culture.

Set in Europe and in the Mediterranean Area during the Classical Age, experience what truly means to manage an Empire.

THE DECADENCE CONCEPT

Expand your dominion through wars of conquest and make your culture a beacon of light, but be careful though. The risk of Decadence is not trivial. Many civilizations have collapsed for not having seen in time the signs of impending crisis. The older your empire, the more challenges will lurk in the shadows. Just expanding your borders without carefully shaping your form of government and culture won't be the wisest of strategies.

MANAGE YOUR EMPIRE

Manage your Empire on a scale that fits you: adjust all the details of an important region, form provinces to oversee your growing realm.

CONSTRUCT

Construct buildings to enhance your army, the life of your citizens, and the economy. Establish and grow a trade network of goods and resources.

THE BATTLE SYSTEM

The battle system is not just about who brings the larger force. Army composition and understanding the strengths and weaknesses of you and your enemy are decisive, so is choosing wisely the battlefield and the general to lead your troops.

FIELD OF GLORY II: INTEGRATION

And, if you want even more direct control, Field of Glory: Empires lets you export and load your battles into Field of Glory II and then load the results back into Field of Glory: Empires!

WEGO

War is decided not just by battles though, but also clever manoeuvres. Simultaneous (WEGO) turn resolution means thinking ahead to intercept – or to escape! – enemy armies will be essential. Field of Glory: Empires offers a living world where every decision has an impact on every actor.

MULTIPLAYER

And once you think you are ready to be challenged, play against real opponents in one of the largest asynchronous multiplayer system ever created.

Fied of Glory Empires is surely a very ambitious project, aiming to bring to life the ancient world and its civilizations and to recreate the cultural intricacies of that time.

To better explain the complexity an the scope of the game, we started writing a series of dev diaries covering the most crucial points around which Field of Glory: Empires is designed.

Today we would like to expand this experience further. Welcome to the Challenge!

The Challenges

These are a series of events focused on special versions of the game. They are designed to explore step by step the game's mechanics but with a twist. These versions have certain areas and features locked, while others are allowed.

But what kind of challenge are we talking about and who can participate?

There is no better way to explain them than having a look at the first one:

Nation available: Rome

Turns: takes as few as possible

Map: Locked to the Italian Peninsula and its closest surroundings.

Mechanics and features: All active

In this race against time, there is room for only one winner.

Who can join?

Time and validity

10 days from the announcement.

In the 10 days of validity, we will gather the videos or the screenshots proving the completion of the challenge and will assign the scores. After all the Challenges have been played, we will declare the final winner by calculating the cumulative points gained in all the episodes.
