## **About This Game**

Practice soccer and other sports the way they are meant to be played: sitting on a couch with your friends!

Soccertron is a local multiplayer sports game for up to 4 *players* with a simple premise: Kick the ball or your friends to win the match!

Play across 5 different game fields resembling some typical ball games: soccer, basketball and volleyball. But beware! There's no referee around and everything is allowed, even the most treacherous actions!

The game mechanics are simple and accessible but matches are fast and unexpectedly fun, leading to friendly rivalry across the different game fields. Ideal for parties and "king of the couch" sessions!

### **Game Features:**

- Fast and frenetic action for up to 4 players.
- *Five different game fields* ranging from easy to infuriatingly hard.
- Competitive bots capable of multiple roles: defense, attack and all around. But really, play with friends.

## **Game Fields**

- Soccertron: Futuristic soccer-like game
- Shrinkotron: Reinventing the old-classics, shrink the other player's goal to win.
- Basketron: Basketball! With neons! In the future!
- Volleytron: Don't let the ball touch your field!
- **Pittron**: Try not to fall on the pit! Beware of the holes!
- Tournament: The winner of 3 out of 5 matches wins!

# Game FAQ

#### Can I play solo?

Yes, of course! The game features a competent bot which you can play against. But seriously, play it with friends.

### Is it online multiplayer?

No. Right now it's only local multiplayer.

I first played this game through some bad circumstances but loved the game and bought it. Great casual game that my girlfriend and I loved to play: simple but with room to grow. I ended up getting too good though and we stopped playing. Definitely worth the money considering I have probably played 15 hours.. This game looked like a lot of fun, but due to the gameplay it just isn't. It sort of reminded me of the oldschool game Slime Volleyball, and it seems like it's heart is in the right place, but it just isn't that good.

I wish I had some constructive criticism for what could be done to make it better. I'd start with the physics- it's just too frustrating to try to hit the ball. On top of that it's way too hard to aim and get it into the goal. I thought volleyball was alright, but after trying it again I've decided that I don't think that's a redeeming quality either- once you lose one point, you're almost guaranteed to lose 2 or 3.

If I had to say something good about Soccertron it's that the menu system is easy to navigate. However, the game mode selection interface is too in-your-face big.

I'm sorry, but I would have to say to avoid this game.

On a sidenote, I tried letting the computer play against an idle player and thought it was funny that the idle player won one of the games. TLDR, here are my pros and cons:

Pros:

- Statistics
- Fullscreen support
- Ability to change volume and resolution
- 5 game modes
- 1-4 player support

- It says it is version 15.05.15, so they must update it a lot (although the game must have either been abysmal at v1 or the version updates must have been something like "changed slider colors from slightly dark white to extremely light gray")

Cons:

- 0 of the game modes are good (there is actually 1 game mode that is good, but it is one that I made up with friends because of a major flaw in one of the actual game modes)

- Tons of gimmicks to easily win at most of the modes

- Annoying objects make any "would have been a great shot" turn into a "oh \u2665\u2665\u2665\u2665\u2665, it just deflected into my own goal"

- Aiming is hard as \u2665\u2665\u2665\u2665
- You can't change anything else
- The game is entirely luck based
- The characters in this game should really be snails, cause that is about how fast you move relative to the ball
- The AI are \u2665\u2665\u2665\u2665ing godlike

- No online multiplayer, althought it isn't like anyone would be using it if there was.

- Last but not least, please look at steam charts and see how few people play it. There is a very good reason why the most players EVER on at once is exactly 4.

- http:///steamcharts.com//app//334620. I bought this game because I thought it was going to be fun playing local-multiplayer but too bad. I was disappointed. Only two buttons to press, either head or punch, it soon become boring after few minutes of playing.. This is really cool !!! I couldn't care less about sports, but this is a good little local multiplayer to put on your laptop, and it won't bog down your system with tons of memory . It's perfect the way that it is, and doesn't need anything . The jet pack jumping action, and the neon look give it a sci-fi flavor . It plays just fine on my Windows 8.1 system . FLIP DAH BUCKS AND GET DAT GAME !. First of all, I would like to mention that I started off hating this game because of it's controls, but then I started using a controller and WOW the change was dramatic. The game is so much better with a controller, it feels way more natural and less awkward to control. Instead of being a game of skitterish squirrels skating on slippery ice, it became a tight and easy to manuever elite soccer game. I really love this game now and so do my friends. This game requires skills and lots of luck, but it is really fun!

Would definitely recommend :D. Great party game. A tournament of this game can get pretty heated in a moment, with everyone dashing and punching and praying for the ball to enter the goal. Its easy to get the hang of, so people not used to play games will surely have fun too.. Soccertron has cool ideas, but ultimately needs a bit of work in the physics and control department. I love couch co-op and versus, which is why I picked up this cheap title. Its fairly simple, there are several sports to play a la two or four-player style (1v1 or 2v2 volleyball, soccer, basketball, etc.). The problem is that it is very difficult to control the ball and actually be \*good\* at it.

We did not play all that long, but it was clear this was the case. There is more button-mashing than anything, really.

<u>Pros:</u> +<u>Its cheap and has some cool ideas</u>

Cons:

-Physics is wonky enought that makes it really difficult to have control and not button-mash
-Side-view sports are not really that fun, IMO
-While there are several game modes - they all play out the same
-No character customization or anything, just lots of neon colors

I got it for half price, and still have buyer's remorse.
